

CALIFORNIA STATE BOARD OF BEHAVIORAL SCIENCES BILL ANALYSIS

BILL NUMBER: SB 1067 **VERSION:** INTRODUCED FEBRUARY 12, 2024

AUTHOR: SMALLWOOD-CUEVAS **SPONSOR:** CALIFORNIA PRIMARY CARE
ASSOCIATION ADVOCATES

POLICY & ADVOCACY COMMITTEE RECOMMENDATION: NONE

SUBJECT: HEALING ARTS: EXPEDITED LICENSURE PROCESS: MEDICALLY UNDERSERVED
AREA OR POPULATION

Summary

This bill would require healing arts licensing boards within the Department of Consumer Affairs (DCA) to expedite the licensure process to give priority review status to an applicant for a license who intends to practice in a medically underserved area or serve a medically underserved population.

Existing Law:

- 1) Requires Boards under DCA to expedite the initial licensure process for applicants who are honorably discharged members of the U.S. Armed Forces. (Business and Professions Code (BPC) §115.4.
- 2) Requires DCA Boards to expedite the licensure process and waive the licensure application fee and the initial license fee for applicants who have a current license in the same profession in another state, and who are married to, or in a domestic partnership or other legal union with, an active-duty member of the U.S. Armed Forces who is assigned to active duty in California. (BPC §115.5).
- 3) Requires the Medical Board of California to give priority review status to applicants who can demonstrate they intend to practice in a medically underserved area or serve a medically underserved population, as defined in §128522 of the Health and Safety Code (HSC). They must provide proper documentation to prove this, which may include a letter from the employer indicating acceptance of employment and a start date. (BPC §2092)
- 4) Defines the following terms for purposes of the California Physician Corps Program, which consists of a loan repayment program and a volunteer program for physicians in the state (HSC §128552 (d) and (e)):
 - a) “Medically underserved population” means the Medi-Cal program and uninsured populations.

- b) “Medically underserved area” means an area defined as a health professional shortage area in Federal Regulations ([42 CFR Part 5, Appendix A](#)), or an area of the state where unmet priority needs for physicians exist as determined by the Department of Health Care Access and Information (HCAI).

This Bill:

- 1) Requires each healing arts board under DCA to develop a process to expedite the licensure process to give priority review status to an applicant for a license who demonstrates they intend to practice in a medically underserved area or serve a medically underserved population as defined in HSC §128552 (cited above). (BPC §871(a))
- 2) Provides that these applicants may demonstrate their intent to practice in a medically underserved area or to serve a medically underserved population by providing documentation, which may include a letter from a qualifying employer indicating acceptance of employment and a start date. (BPC §871(b))

Comments:

- 1) **Author’s Intent.** The author states that many licensing healing arts boards have lengthy backlogs for processing applications, which exacerbates the healthcare workforce shortage. They point to a 2013 bill that established a requirement that the Medical Board of California expedite license applications for applicants who intend to practice in a medically underserved area or serve a medically underserved population and are seeking to use that bill as a model for other healing arts boards.
- 2) **Acceptable Settings Unclear.** The bill relies on the definitions of “medically underserved area” and “medically underserved population” in HSC §128552 to determine who qualifies for an expedited license:

HSC §128552

(d) “Medically underserved area” means an area defined as a health professional shortage area in Part 5 of Subchapter A of Chapter 1 of Title 42 of the Code of Federal Regulations or an area of the state where unmet priority needs for physicians exist as determined by the department.

(e) “Medically underserved population” means the Medi-Cal program and uninsured populations.

HSC §128552 defines these terms for purposes of the California Physician Corps Program, which consists of a loan repayment program and a volunteer program for physicians in the state.

Medically Underserved Area

The section’s definition of a “medically underserved area” references Federal Regulations, 42 CFR Part 5, Appendix A. However, this definition appears heavily focused on primary care physicians, and it is unclear if it is appropriate to use to

define underserved areas of other healing arts practitioners, or if a more tailored definition is needed.

HSC §128522 also states in its definition of a “medically underserved area” that it includes an area of the state where unmet priority needs for physicians exist as determined by HCAI. Although no explicit definition appears on HCAI’s website, they appear to have mapped acceptable areas for purposes of their Physician Corps Loan Repayment Program. A lookup of eligible worksites by area for that program can be found [here](#). However, it is unclear if underserved areas for physicians will always match underserved areas for other healing arts practitioners.

Medical Board has nearly identical language already in its law, and they indicate they use [this federal website](#) of designated shortage areas to determine if the address in question qualifies.

Medically Underserved Population

The definition of a “medically underserved population” is broad, and it is unclear what threshold the Board should use to determine if an applicant qualifies.

- 3) **Board Impact.** Depending on the volume of applications received, this bill could have a detrimental impact on Board processing times if the Board’s evaluators must spend a large amount of time determining whether someone’s intended work setting qualifies for expedited licensure instead of evaluating applications, especially if the definition of qualifying settings is nuanced and difficult to determine. Additionally, staff has concerns that success of this bill could lead to numerous other proposals to expedite licensure for valid reasons, which could end up increasing processing times overall as staff spends increasing amounts of time determining expedite eligibility and fielding applicant questions regarding eligibility.

HCAI has provided recent data from the Board’s renewal surveys that approximately 19% of the Board’s registrant population works in a Federally Qualified Health Center (FQHC), clinic, or community health center, which are settings that would likely qualify for the expedite. Last Fiscal Year (FY 2022-23), the Board processed approximately 16,500 applications. The year before that (FY 2021-2022), it processed approximately 16,300 applications. This equates to approximately 3,000 applications per year that would qualify to be expedited.

- 4) **Medical Board Statistics.** The Medical Board has been expediting licensure for those working in a medically underserved area or a medically underserved population for several years now. DCA reports that in Fiscal Year 2019/2020, they expedited 164 applicants for work in underserved settings.

That Fiscal Year, the Medical Board received roughly the same number of applications as BBS did: approximately 11,300 applications for Medical Board, versus 12,200 applications for BBS.

- 5) **Policy & Advocacy Committee Recommendation.** At its April 2024 meeting, the Policy and Advocacy Committee did not recommend a position on the bill.

However, it directed staff to reach out to the author's office to discuss further clarifying who would qualify for the expedite.

- 6) **Proposed Amendments.** Staff contacted the bill's sponsor to ask for further clarification regarding who they intend to qualify for the expedite. The sponsor has indicated that they intend that qualifying sites will be in the database. They have offered amendments shown in the first part of **Attachment A**, titled "Author's Suggested Amendments."

However, after consulting with DCA Legal on the sponsor's suggested amendments, there are concerns that regulations would be needed to specify the use of a specific database if the Board would make its decision to expedite solely on a database. Staff and Legal Counsel have drafted amendments that would accomplish this, shown in the second part of **Attachment A**, titled "Board Staff and Legal Suggested Amendments."

- 7) **Staff Recommendation.** Staff recommends that the Board consider taking an "Oppose unless Amended" position on this bill. The amendments would be the staff and Legal Counsel suggested amendments shown in **Attachment A**. Additionally, that language would need to specifically name any and all databases the sponsor intends boards to use to determine expedite eligibility.
- 8) **Previous Legislation.** AB 1288 (Chapter 307, Statutes of 2013) required the Medical Board of California to give priority review status to applicants who can demonstrate they intend to practice in a medically underserved area or serve a medically underserved population, if they provide appropriate documentation.
- 9) **Related Legislation.** The following related bills are being proposed this year:

AB 2442 (Zbur) would require the Medical Board, the Osteopathic Medical Board, the Board of Registered Nursing, and the Physician Assistant Board to expedite the licensure process for applicants who demonstrate they intend to provide gender-affirming health care or gender-affirming mental health care in their scope of practice.

AB 2862 (Gipson) would require boards to prioritize African American applicants seeking licenses, especially those descended from a person enslaved in the United States.

- 10) **Support and Opposition.**

Introduced by Senator Smallwood-Cuevas

February 12, 2024

An act to add Section 871 to the Business and Professions Code, relating to healing arts.

legislative counsel's digest

SB 1067, as introduced, Smallwood-Cuevas. Healing arts: expedited licensure process: medically underserved area or population.

Existing law establishes various boards within the Department of Consumer Affairs to license and regulate various health professionals. Existing law requires specified boards to expedite the licensure process of an applicant who can demonstrate that they intend to provide abortions within their scope of practice and specifies the documentation an applicant is required to provide to demonstrate their intent.

This bill would require each healing arts board, as defined, to develop a process to expedite the licensure process by giving priority review status to the application of an applicant for a license who demonstrates that they intend to practice in a medically underserved area or serve a medically underserved population, as defined. The bill would authorize an applicant for a license to demonstrate their intent to practice in a medically underserved area or serve a medically underserved population by providing proper documentation, including, but not limited to, a letter from an employer, located in a medically underserved area or which serves a medically underserved population, indicating that the applicant has accepted employment and stating the start date.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:

- 1 SECTION 1. Section 871 is added to the Business and
2 Professions Code, to read:
3 871. (a) Each healing arts board shall develop a process to
4 expedite the licensure process by giving priority review status to
5 the application of an applicant for a license who demonstrates that
6 they intend to practice in a medically underserved area or serve a
7 medically underserved population, as defined in Section 128552
8 of the Health and Safety Code.
9 (b) An applicant for a license may demonstrate their intent to
10 practice in a medically underserved area or serve a medically
11 underserved population by providing proper documentation,
12 including, but not limited to, a letter from an employer, located in
13 a medically underserved area or which serves a medically
14 underserved population, indicating that the applicant has accepted
15 employment and stating the start date.
16 (c) As used in this section, “healing arts board” means any
17 board, division, or examining committee in the Department of
18 Consumer Affairs that licenses or certifies health professionals.

O

Attachment A SB 1067 Suggested Amendments

Author Suggested Amendments

BPC §871.

(a) Each healing arts board shall develop a process to expedite the licensure process by giving priority review status to the application of an applicant for a license who demonstrates that they intend to practice in a medically underserved area or serve a medically underserved population, as defined in Section 128552 of the Health and Safety Code.

(b) An applicant for a license may demonstrate their intent to practice in a medically underserved area or serve a medically underserved population by providing proper documentation, including, but not limited to, a letter from an employer, indicating they are located in a medically underserved area or which serves indicating they serve a medically underserved population, and identifying which, along with indicating that the applicant has accepted employment and stating the start date.

(c) Compliance with this provision does not require the Department of Consumer Affairs or any of the boards listed in subdivision (a) to open a regulatory or rulemaking process to change their licensee application process. The above boards shall be deemed to be in compliance with this section if they include a supplemental letter or cover statement to their application explaining the availability of this expedited licensure process, and indicating what their employer would need to provide the board with, in order for the applicant to qualify for the priority review status.

~~(e)~~ (d) As used in this section, “healing arts board” means any board, division, or examining committee in the Department of Consumer Affairs that licenses or certifies health professionals.

Board Staff and Legal Suggested Amendments

BPC §871.

(a) Each healing arts board shall develop a process to expedite the licensure process by giving priority review status to the application of an applicant for a license who demonstrates that they intend to practice in a medically underserved area or serve a medically underserved population, as defined in Section 128552 of the Health and Safety Code and meets the requirements for expedite as described in subdivision (c) or (d).

(b) An applicant for a license may shall demonstrate their intent to practice in a medically underserved area or serve a medically underserved population by providing a

letter addressed to the applicable healing arts board from the employer containing all of the following information: proper documentation, including, but not limited to, a letter from an employer, located in a medically underserved area or which serves a medically underserved population, indicating that the applicant has accepted employment and stating the start date.

(1) The name of the employer;

(2) The address and telephone number of the employer;

(3) That the employer is located in a medically underserved area or serves a medically underserved population;

(4) The applicant's name;

(5) That the applicant has accepted employment with the employer in the same business or profession within which the applicant applies for licensure with the board;

(6) The applicant's start date with the employer; and,

(7) A written statement, signed and dated by an authorized representative of the employer, on the employer letterhead, declaring that the information provided in the letter to the board is true and correct.

(c) A healing arts board shall expedite the application if the address provided by the employer in subdivision (b) is contained in the current designated health professional shortage area database compiled by the Federal Health Resources and Services Administration.

(d) A healing arts board may utilize additional criteria other than the health professional shortage area database to determine practice in a medically underserved area or a medically underserved population if the healing arts board includes instructions in their application explaining the availability of this expedited licensure process, and indicating other information the employer would need to provide in order for the applicant to qualify for the expedited licensure process.

(e) All criteria, guidelines, and policies developed by a healing arts board for the administration of this section shall be exempt from the rulemaking provisions of the Administrative Procedure Act (Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code).

(f) As used in this section, "healing arts board" means any board, division, or examining committee in the Department of Consumer Affairs that licenses or certifies health professionals in Division 2.
